Control Valve Solution we solve the valve problem

- Control valves
- Safety valves
- Ball valves
- ARC valves (Pump recirculation valve)
- Various special purpose valves

- Repair
- Retrofit
- Custom Engineered Valve
- Field Services

CEO's experiences

- Metso Korea, R&D director, Technical advisor
- Dresser MARC & GTC
- Grove & Ledeen services (HHI, SHI, DSME)
- SNRI services (HHI, SHI, DSME)
- Providing Globe control valves for Youngheung Thermal Power Plant 5 & 6
- HPC #2 NCC, 750 Masoneilan CVs start up commissioning
- Samcheonpo Thermal Power Plant, Drum safety valve (226K set) Korea's first KESCO Actual popping test
- Design & development engineer for self acting regulators, steam traps, pneumatic globe control valves

Training record

- Dresser Consolidated - SV & SRVs, Louisiana-USA
- Niigata Masoneilan - Control Valves & Digital products, Niigata-Japan
- Dresser Singapore - Control Valves & SRVs, Singapore
- SNRI - Cryogenic control valves, Ruffec-France
- Grove - Ball valves for Marine & shipbuilding, Voghera-Italia
- Ledeen - Actuators & instrumentations for Shipbuilding, Voghera-Italia

01 Valve Repair

Repair Program

Over 30 years' experiences specialized in control valve design, development, manufacturing and aftermarket services.

1step Repair

Program of overhaul concept

- 1 New replacement of soft goods
- 2 Measurement of Seat leak
- 3 Air tightness test of all valves
- 4 Function test (Inspection of disassemble an Actuator is not included.)

2step Repair

- 1 ~ 4 Same as step 1
- 5 Partially process and modify internal parts
(Inspection of disassemble an Actuator is not included.)

3step Repair

- 1 ~ 5 Same as step 2
- 6 Partially produce a new internal part and special processing (Stellite, etc)
- 7 Inspection of disassemble an Actuator is included.

02

Valve Retrofit

Valuation can provide a replacement valve of the same or similar specification that can be used to assist your continuous operation as we can possible.

Retrofit is a program that improves the performance to solve the problems for extreme noise, vibration, abrasion and erosions.

01

Trim retrofit

Body, Bonnet retrofit

02

03

Actuator retrofit

Instrument retrofit

04

03

Custom Engineered Valve

We sincerely make Custom Engineered Valves to meet your special process and purpose with 30 years of experience.

04

Our Owning Valve

we solve the valve problem
control valve solution

Valve Test Equipment

1	Control valve tester, Hydraulic 12" 1500#	1EA
2	Control valve tester, Pneumatic 8" 300#	1EA
3	Control valve tester, Pneumatic 6" 300#	1EA
4	PSVs tester, Hydraulic 8" 1500#	1EA
5	Booster pumps	3EA

Valve Machining Equipment

1	Lathe machine, 410 x 1,060	1EA
2	Lathe machine, 600 x 1,500	1EA
3	Milling machine, #2	1EA
4	Up right drilling machine	1EA
5	Drill & Tapping machine	1EA
6	ARC & TIG weld machine	2EA
